Amendments to the Claims:

The following listing of claims will replace all prior versions, and listings, of claims in the application:

- 1. (Currently Amended) A reinforcing member which that is integrally cast with a cast metal, comprising:
 - a material which that is different from the cast metal; and
 - a hollow portion that is a closed space having no member therein.
- 2. (Original) The reinforcing member according to claim 1, the reinforcing member comprising:
 - a stacked structure having plated members;
- openings formed at the plated members, the openings forming the hollow portion; and members laminated on both surfaces of the stacked structure and covering the openings.
- 3. (Previously Presented) The reinforcing member according to claim 1, the reinforcing member comprising:
- a porous body covering a portion of the reinforcing member or overall surfaces of the reinforcing member.
 - 4. (Original) The reinforcing member according to claim 3, wherein the porous body is composed of a porous fibrous material of metal fiber.
 - 5. (Previously Presented) An engine block comprising:
 - a journal portion for which the reinforcing member recited in claim 1 is used.
- 6. (Currently Amended) A production method for a reinforcing member <u>having a</u>

 hollow portion that is a closed space having no member therein which that is integrally cast with the cast metal, comprising:

stacking plated members having openings; and

laminating the plated members on an upper member and a lower member of the stacked plated members so as to cover the openings.

7. (Original) The production method for a reinforcing member according to claim 6, wherein the production method further comprising:

covering a portion of the reinforcing member or overall surfaces of the reinforcing member with a porous body.

8. (Original) The production method for a reinforcing member according to claim 7, wherein the porous body is composed of a porous fibrous material of metal fiber.
